General Counsel

Installation of Outside Telephone

Our branch office, located in the "J" Building, requests the installation of an outside telephone in Room 2066 "J" Building.

The telephone will be used, for security reasons, to take care of the increasing number of covert calls to outside representatives and counsels to discuss matters with respect to certain classified projects which should not be discussed over a Government telephone.

For further information, please contact  extension  Office of the General Counsel.
